

Art Of Teaching 4.0

Event Dates: 15 Nov - 30 Nov 2025

Winners Announcement: 15 Dec 2025

Registration Deadline: 15 Nov 2025

Video Submission (Level 1):
15 Nov 2025, by 11:59 PM

Register link:

<https://mulearn.org/r/artofteaching>

Course Design (Level 2): 30 Nov 2025

About the Event

Education is the **cornerstone of progress**, and teachers are the **architects of the future**.

Art of Teaching celebrates educators who bring creativity, clarity, and innovation into their classrooms making learning simple, engaging, and unforgettable!

This year, we're introducing **AI-powered creativity**.

- Not to replace teachers - but to empower them.
- Use AI tools to make concepts easier, lessons more interactive, and students more curious!

Bring your **personal touch**, mix in **AI innovation**, and show us your **unique teaching style**!

Competition Structure

Two levels to build your submission:

- **Level 1: Video Submission** - A 5-minute demonstration simplifying your selected topic (English, MP4, face visible, AI-enhanced with human elements).
- **Level 2: Course Design Document** - 10-15 page PDF/Word expanding the video (overview, AI-generated syllabus, methods, assessments-70% theory, 30% practicals).

Important Rules

- Use AI as an *assistant*, not a *replacement*.
- Exactly **5 minutes** for videos - concise and powerful!
- Mention all **AI tools** used.
- Clearly define **learning outcomes & resources**.
- Ensure **original work** - plagiarism = disqualification.

- Level 2 access is **invite-only**.
- No YouTube video clips should be included.

Submission Guidelines

Submit your entries as follows:

- **Level 1:** Upload your video to **YouTube** and share the **YouTube link** in the **registration form** during registration.
- **Level 2:** Participants who qualify after Level 1 will receive a separate **Airtable form** to submit their **course document**.

Stick to the deadlines - *late submissions won't be accepted!*

Evaluation Criteria

Total Marks: 50

Time Limit for Video: 5 minutes

1. Creativity & Innovation (10 Marks)

What we're looking for:

Your ability to present concepts in an **original, interactive, and imaginative way**. This includes beyond-syllabus thinking, demonstrations, and creative use of technology or everyday examples. Real-world applications and experiential learning are highly encouraged.

Scoring Guide:

- **9–10** : Highly creative and original; brings concepts to life using innovative, interactive visuals/ideas.
- **7–8** : Creative with engaging elements, but could expand or experiment further.
- **5–6** : Some creativity present; mostly traditional or theoretical.
- **1–4** : Minimal originality; over-reliant on static slides or AI content

2. Clarity & Communication (10 Marks)

What we're looking for:

How clearly the concept is explained. The content should be **logically structured, easy to follow, and simplified** so that even a beginner can understand.

Scoring Guide:

- **9–10** : Exceptionally clear and structured; concepts broken down logically; very easy to follow.
- **7–8** : Clear explanation; minor gaps or small jumps in flow.
- **5–6** : Understandable but lacks smooth transitions or flow.
- **1–4** : Difficult to follow; unclear or confusing explanations.

3. Effectiveness & Engagement (10 Marks)

What we're looking for:

How well your teaching keeps learners interested and ensures understanding. Interactivity and connection matter more than length or perfection.

Ways to Engage Learners:

- Asking short questions or quick reflections.
- Demonstrating live examples or using visual aids.
- Connecting concepts to **real-world applications or student experiences**.

Scoring Guide:

- **9–10** : Highly engaging, interactive, and learner-focused; encourages thinking, responding, or visualizing.
- **7–8** : Engaging for most parts; good use of examples and visuals.
- **5–6** : Partially engaging; limited interactivity.
- **1–4** : Monotonous or purely lecture-style; low engagement.

4. Delivery & Presentation (10 Marks)

What we're looking for:

Confidence, clarity, and energy in your delivery. **Face must be visible** throughout the video to build trust and connection with learners.

Scoring Guide:

- **9–10** : Confident, expressive, natural tone, strong presence; face clearly visible.
- **7–8** : Clear and natural; small lapses in energy or flow.
- **5–6** : Acceptable delivery; lacks enthusiasm or expression.
- **1–4** : Low energy, unclear speech, or poor visibility.

5. AI Integration & Visual Enhancement (10 Marks)

What we're looking for:

Thoughtful use of AI or digital tools to **enhance teaching, not replace it**. AI should assist in visualizing, simplifying, or illustrating concepts creatively.

Examples:

- Using ChatGPT, Gemini, or similar tools to generate prompts, quiz questions, or illustrations.
- Using Runway ML, Pika, Canva Magic Studio, or other tools for short animations or infographics.
- AI voice modulation or subtitles for accessibility — but your **voice and personality remain central**.

Scoring Guide:

- **9–10** : AI used creatively and meaningfully to enhance learning; clear human input; original.
- **7–8** : Good AI use; can be more balanced or creative.
- **5–6** : Basic or minimal AI integration.
- **1–4** : Fully AI-generated or lacks teacher involvement.

Evaluator Notes

- Reward **experiential, interactive teaching** — students should be able to see, touch, and feel the concept.
- Originality is critical; AI is an **assistant, not the teacher**.
- Marks reflect **clarity, creativity, engagement, and impact** of the presentation
- Language: **English**

Level 1

Task 1: Bring Your Topic to Life on Video!

Title: Simplify, Engage & Inspire!

Deadline: 15 November 2025, by 11:59 PM

Key Steps to Nail It

1. Choose and Explain Your Topic

Pick a concept that challenges students - something that needs your teaching magic!
Create a short, focused video that makes the topic *click* for viewers. Use relatable examples and real-world connections.

Tip: Use AI to Bring Your Topic to Life

AI should act as your **teaching assistant**-helping students **visualize, interact, and understand concepts more clearly**.

Examples:

1. **Mechanical Engineering:**

Consider you are a faculty in Mechanical Engineering. You want students to **experience the working of a 4-stroke engine**. Using AI, create a **visually interactive animation** showing how pistons, crankshafts, and valves move in real time. Students can **see the engine in motion**, making the process much easier to grasp than static diagrams.

2. **Computer Science / Computer Organization:**

Consider you are a faculty in Computer Science. You want to teach **logic gates**. AI can simulate **LED lights turning on/off based on gate operations**. For example, typing a word like "TEACHING" could trigger different gate combinations to visually show how inputs and outputs work, making abstract logic tangible.

3. **Biology / Life Sciences:**

Consider you are a faculty in Biology. You want students to understand **cell division**. AI can generate **dynamic visualizations of the stages of mitosis or meiosis**, showing chromosomes moving, splitting, and forming new cells. Students can **follow the process step by step** rather than just reading about it.

4. **Chemistry / Physical Sciences:**

Consider you are a faculty in Chemistry. You want to teach **chemical reactions**. AI can simulate **color changes, gas evolution, or energy changes in a reaction**, so students can **observe and predict outcomes** without needing to conduct every experiment physically.

Tips for Using AI:

- Use AI visuals, simulations, or interactive modules to **complement your teaching**.
- Keep your **voice and explanation central** - AI should assist, not replace you.
- Make examples **simple, clear, and relatable**, so students can **connect concepts to real-world applications**.

Tip: Make It Interactive with Student Tasks

Teachers can make their sessions more engaging by assigning short, relevant tasks to students during the video:

- **Assign Mini Tasks:** Give students a quick activity related to the topic, like solving a problem, drawing a diagram, or completing a small experiment.

- **Collect Proof of Work:** Students can submit screenshots, photos, or digital files as evidence of their work.
- **Keep It Fun & Interactive:** Tasks should be simple, meaningful, and designed to make learning playful and engaging.

2. Keep It Snappy & Real

Duration: 5 minutes max

Language: English

Format: MP4

Face visible throughout the video - we want *you* in action!

Evaluation focuses on:

- **Delivery:** Smooth and confident presentation
- **Creativity:** Innovative ideas + visual engagement
- **Clarity:** Easy-to-understand explanation
- **Effectiveness:** Real teaching impact
- **AI Integration:** Use AI tools thoughtfully to enhance (not replace) your approach

3. Share It Out

Upload your video to **YouTube** and share the **YouTube link** in the **registration form** during registration

That's your moment to shine!

Why This Rocks

We're looking for educators who turn learning into an experience.

This challenge celebrates your creativity, your clarity, and your courage to use **AI tools** to make complex ideas simple and fun.

So dive in - teach, inspire, and **show us your classroom charisma!**

Quick Reference

- **Goal:** Simplify a complex concept in a creative way
- **Show your face:** Build that authentic connection
- **Use AI:** To add value, visuals, or interactivity
- **Be yourself:** Originality always wins

Level 2

Build Your Epic Course Blueprint!

Deadline: 30 November 2025

Format: PDF or Word (10-15 pages)

The Heart of It All

Now that you've lit the spark with your video, it's time to **expand it into a full course experience!**

Your goal is to create a complete teaching blueprint that reflects your creativity, structure, and AI-powered teaching flair.

Here's what to include:

- **Course Overview**
Outline the course's purpose, big-picture goals, and any prerequisites learners should know before jumping in.
- **Course Outline**
Design an AI-supported syllabus covering every module. Follow a 70% theory + 30% practical mix - keep it lively with interactive polls, Q&As, or reflection tasks.
- **Teaching Methods**
Highlight your signature classroom techniques - storytelling, live demos, real-world connections - that make your lessons unforgettable.
- **Assessment Methods**
Detail how you'll measure student understanding. Use creative methods like mini-projects, group tasks, or real-time feedback to keep the learning loop alive.
- **Course Outcomes**
Define what learners will gain - new skills, insights, or mindsets that make them say, "I got this!"
- **Resource References**
Add all must-reads, videos, or tools that support your teaching journey and credit your inspirations.
- **AI Tools Used**
List all AI tools that helped design, structure, or visualize your course. Keep it ethical

with transparent acknowledgments.

- **Optional: Include Your Level 1 Video Link**

Add a link to your Level 1 video (Task 2 submission) alongside your document. This shows how your original interactive teaching inspired your full course design.

Showcase Your Work

When you're ready, upload your **PDF or Word file** through the **Airtable form** you'll receive after qualifying for **Level 1**.

Why This Feels Awesome

This is your chance to **dream big** - to build a course that not only *teaches* but *transforms*.

Blend your human creativity with the smart power of AI, and show how meaningful, modern teaching truly looks.

Your voice. Your design. Your impact.

You've got this - now go create something unforgettable!

Awards & Recognition

- Winners get **certificates + cash prizes** (₹25,000 total pool)
- Get featured, inspire others, and shape the next wave of educators!

Final Note

Bring your creativity.
Blend it with technology.
And let's **redefine the art of teaching together**.

Frequently Asked Questions (FAQ)

Q1: Can I use fully AI-generated content in my video or course?

A: No. The program emphasizes *your personal teaching style*. AI can enhance visuals, animations, or interactivity, but your own explanations, examples, and teaching contributions must be central. Fully AI-generated content is not acceptable.

Q2: Is showing my face in the video mandatory?

A: Yes. Your face must be visible throughout the video to create an authentic connection with learners and showcase your teaching style.

Q3: Is AI use mandatory?

A: Yes. AI tools must be used to enhance your video or course, for example, to create visualizations, simulations, or interactive demonstrations. The **Beyond Syllabus** tool (<https://beyondsyllabus.in/>) is the preferred AI platform for this purpose, but you must ensure your teaching remains central. AI should **assist**, not replace your explanations.

Q4: Can I submit in a language other than English?

A: No. English is mandatory for all submissions to ensure clarity and accessibility.

Q5: Can I include clips from YouTube or other sources?

A: No. Only original content created by you is allowed. This ensures authenticity and emphasizes *your teaching creativity*.

Q6: How long should the video be?

A: Exactly **5 minutes**. Videos should be concise, focused, and impactful. Submissions exceeding the time limit will not be accepted.

Q7: How is creativity assessed?

A: Creativity is judged on how effectively you make concepts interactive, experiential, and engaging. Examples include demonstrations, visualizations, real-world connections, or AI-assisted animations - all delivered through your own teaching style.

Q8: Can I use AI to write my script?

A: AI may be used to suggest ideas, prompts, or visuals, but the final script, examples, and delivery must reflect your own style, and teaching approach.

Q9: What happens if I don't follow the rules?

A: Submissions that violate rules, such as fully AI-generated content, plagiarism, or including YouTube clips may be disqualified or lose marks. Following the rules ensures fair evaluation and proper recognition of your creativity.
